Authorized to work in the US | Open to relocation

EDUCATION

IE University Madrid, Spain
Bachelor in Computer Science and Artificial Intelligence *2026*

EXPERIENCE

WhiteHole
Quantitative Research Intern *Jun 2025 – Nov 2025*

- Built macroeconomic forecasting models (CPI, GDP) from housing-market data.
- Built NLP models linking public political communications to market volatility, including regime analysis.
- Built a knowledge-graph pipeline from NLP-extracted entities and relations using locally hosted language models.

MAI-Book Remote
Front-end Developer Intern *Jun 2023 – Oct 2023*

- Built user-facing web interfaces for an online library; ran A/B tests and UX research to improve engagement.

RESEARCH AND PROJECTS

JEPA Transformer (ArgusJEPA + CassaFormer) *PyTorch, Triton 2026*

- Two-stage US equity forecaster; open-source code and released weights. Built a point-in-time data platform (IBKR, SEC filings by acceptance time, FRED/ALFRED vintages, scored news) on PostgreSQL and DuckDB over a survivorship-free top-500 universe.
- Self-supervised JEPA encoder (EMA teacher, 50% masked views) frozen into 256-d daily embeddings for a separately trained 2.05M-parameter causal decoder with RoPE, QK-RMSNorm, top-1 MoE and a Student-t head.
- Fused Triton kernels kept only where they beat `torch.compile` (L4): MoE 1.2–4.1× per layer, 1.1–1.5× end to end.

TC_ACC: Autonomous Documentary Studio *Python, LangGraph, Remotion 2026*

- Agentic system that turns a case reference into a researched, narrated, scored and rendered 10-minute documentary in about five hours, with no human intervention.
- 29 stages, 6 departments, 2 review gates; typed Pydantic artifacts, resumable stages, 46 CI tests run keyless.

Bachelor Thesis (draft paper, ICLR format) *Supervisor: Dr. Luciano Dyballa*

- "A Cross-Description Test of Sparse Feature Correspondence Between Language Models and fMRI Responses."
- Tested whether brain and LM mappings share sparse features: 59 participants, 200 parcels, six SAE systems (1B–12B).

Sparse Autoencoder Releases *PyTorch, Hugging Face, GCP*

- OLMo SAE Builder: released seven SAELens-compatible TopK SAEs for OLMo-3-7B-Think (∼20M activations per layer).
- Triplet SAE Project: SAE steering vs. LoRA for triplet extraction; shipped a fine-tuned Gemma 3 4B (GPTQ).

LEADERSHIP

- **Founder**, IE Quant Finance Club.
- **Founder and President**, IE Dominican Republic Club: grew its flagship event into the university's largest student-led diversity event (500+ attendees).
- **Business Development Officer**, IE Investment Club: secured sponsorships with financial-sector firms.

SKILLS

ML and research:	PyTorch, Triton, Hugging Face (Transformers, PEFT/LoRA, SAELens), SAEs, JEPA, MoE, NLP, forecasting
Engineering:	Python, C++, SQL, TypeScript; LangGraph, Pydantic, FastAPI; PostgreSQL, DuckDB; Docker, GCP, Azure
Languages:	Spanish (native), English (fluent), French (B1)
